PIC/D-93-59  
12 May 1959

MEMORANDUM FOR: Assistant to the DD/I (Administration)

SUBJECT: Proposed Revision of [ ] Organization  
and Functions, Office of the DD/I, Photographic  
Intelligence Center

25X1

1. On Wednesday afternoon, 6 May, Mr. Amory visited PIC on his regular weekly schedule. It was noted for him that coordination of the subject regulation with DD/P was now at a point where differences between PIC and the DD/P representatives centered upon responsibility for Research and Development, and his guidance was solicited. To best understand the DD/P position, it was considered appropriate that he read Attachments C and D to this memorandum which detail the DD/P position on the matter per Messrs. Wallace R. Lampshire and [ ]. He agreed to do so but requested that the documents be sent to him. Accordingly, I am forwarding same.

2. In order to more readily understand our current status in this matter, I am enclosing copies of the original PIC regulatory proposal submitted for coordination, Attachment A, and a counterproposal, Attachment B, dated 13 April 1959, received from [ ] of Mr. Bissell's office, which signifies concurrence on all but the f. and g. functional statements of Attachment A. Attachments C and D represent primarily Mr. Lampshire's efforts to bring about procedural agreements between PIC and TSS which, in my opinion, presume a willingness on the part of the DD/I to delegate PIC's research and development to TSS. The ramifications of such a delegation are many, and Mr. Lundahl is anxious to discuss the issue generally with Mr. Amory subsequent to his review of the DD/P R 1-130 counterproposal and the Research and Development Relationships paper.

3. Please do not hesitate to call me if further explanations are necessary concerning the attachments.
